# Traditional Chinese Medicine (TCM)

One of the oldest and safest forms of medicine in the world (5000 +years). TCM uses many modalities to treat not only the symptoms, but also the root causes of disease. It works by identifying and correcting any energy imbalances within an individual and restoring the energy to its natural balance and flow. TCM acts in a gentle and gradual manner to assist the body to heal itself in a holistic way. This minimizes any side effects while still being very effective for a wide variety of disorders.

- **Herbal Remedies:** Chinese herbal medicines act in a gentle and gradual manner, assisting the body to heal itself in a holistic way so that the root cause of the problem is treated along with the symptoms. Typical prescriptions can range from 10 or 20 days
- **Acupuncture:** The insertion of ultrafine needles into the skin at specific points along meridians that are key to the healing process. This is the most well-known and commonly used treatment modality. Acupuncture stimulates your body's natural healing mechanism, helping to restore physical and mental balance. Acupuncture has been proven to be effective in treating a wide variety of illness and disorders.
- **Moxibustion:** The use of a dried plant called mugwort which is burnt and produces a therapeutic heat. There are several types of moxibustion; we predominantly use indirect moxibustion which is applying heat close to the skin at specific acupuncture points to dispel cold and dampness from the body.
- **Cupping:** In a typical cupping session, glass cups are warmed using a cotton ball or other flammable substance, which is soaked in alcohol, lit, and then placed inside the cup. Removing the oxygen, creating a vacuum and the cup is anchored to the skin. The vacuum draws up the skin to open up the skin's pores, which helps to stimulate the flow of blood, balances and realigns the flow of *Qi*, breaks up obstructions, and creates an avenue for toxins to be drawn out of the body.  
Depending on the condition being treated, the cups will be left in place from 5 to 10 minutes or a small amount of medicated or herbal oil is applied to the skin which allows the practitioner to move the cups over specific acupoints or meridians.
- **Bloodletting:** An ancient technique that calls for using a specialized tool to draw blood from the body to treat a patient. Bloodletting is used to invigorate the smooth flow of *Qi* and blood, dispersing *Qi* and blood stasis, drain excess heat and fire, or induce bleeding to bring down yang rising.

**For more information regarding treatments, please speak with your Traditional Chinese Medicine Practitioner.**
